## DUAL\$aver

ULTIMATE HEATING PERFORMANCE

FOR CONSISTENT HEATING COMFORT YOU CAN COUNT ON.

Unlike conventional, single-stage furnace technology, KLIMAIRE's Dual\$aver technology eliminates the temperature swings resulting from abrupt, high-stage stops-and-starts of the furnace by operating at a low heating stage the majority of the time. This enables your KLIMAIRE GMH95 furnace to gradually and pleasantly increase the temperature of your home environment. And if low-stage heating doesn't warm your home to the desired temperature quickly enough, Dual\$aver shifts your furnace into high stage to ensure your comfort.

OTHER BENEFITS OF DUAL\$AVER TECHNOLOGY INCLUDE:

- Quiet furnace operation
- Virtual elimination of the stagnant pockets of air that can form when the furnace stops running
- Increased air filtration providing improved air quality

INDUSTRY-LEADING ENERGY EFFICIENCY

Your KLIMAIRE GMH95 95% AFUE Gas Furnace gets top ratings in energy efficiency, which is the key to controlling the cost of heating your home. This furnace's 95% AFUE rating means that 95 cents of every \$1.00 of heating energy expense warms your home. Some older central heating systems rate at 60% AFUE, meaning only 60 cents of the gas burned contributes to your home's heating.

At 95% AFUE, your high-efficiency KLIMAIRE GMH95 Furnace meets the stringent requirements of the Environmental Protection Agency's Energy Star Program.
